

Kamay Botany Bay Environmental Education Centre

Stage 3: Factors that Shape Places

An Environmental Case Study

Factors that Shape Places allows students to investigate the human impacts of life on the Kurnell Peninsula through history.

Students will complete a Geographical Inquiry process to investigate “How can Kamay Botany Bay NP sustainably meet the diverse needs of increased tourist numbers?”

Students will examine a variety of perspectives as they collect, analyse and compile data as part of undertaking a feasibility study for the introduction of a ferry service to the area. Students will consider use of the park both in the past and present times as well as the impact that users have on the National Park. Students will use GPS devices to interpret geographical data during their investigations.

Geography

GE3-3 compares and contrasts influences on the management of places and environments

GE3-4 acquires, processes and communicates geographical information using geographical tools for inquiry

Cross-curriculum priorities

Perspectives of traditional Aboriginal lifestyle are integrated throughout the program.
