

# The Art of Nature & Wellbeing

## Teacher Professional Learning

This course allows teachers to attend a stimulating visual arts workshop of hands on learning and networking opportunities. The professional learning day includes working with a variety of visual art forms using different mediums. During the day teachers will investigate the links between nature, art and student wellbeing practices which can include strengthening their cognitive, physical, social, emotional and spiritual development as per the NSW Department of Education and Communities The Wellbeing Framework for Schools 2015.

Programming advice from a Curriculum Advisor will help teachers to develop a series of 6 art lessons after the course.
